Everyone of them are (Googoes;) insurgents can't tell them apart. The only way to have peace in this country is to have an army go through and kill them off; if not, this will contine for years. While on the hills we came across a tribe of igeratte. They are friendly to the Americans. They let their hair grow long, both men and women, and are better looking people than the Filipinos. When this trouble first started, one of the Philippine leaders got these people on their side by saying the American guns shot cotton and were harmless. A large body of them started out to capture a town a few miles from Manila, and they run up against some light artillery and a rapid firing gun, and only two dismounted, threw his reas over his miles around. In the hearing of a motion for a new trial in the Ruthven murder case at Cleveland, Friday, Prof. Smith, whose every day name is plain John Kaehn, was forced to tell something relative to the manner in which he accomplished this trick. The Plain Dealer says:

The examination of Kaehn proved to be very amusing. On the crossexamination Prosecutor Keeler demanded to know the business of the witness. The witness said that he lived at No. 325 Lake st., and was known as Professor James Smith, and BEAUTIFUL AND USEFUL CHRISTMAS GIFTS that his specialty was being buried that there was a proper and an unmis- Dr. Robins, Saturday evening at play the role of resurrection angels worship with us. should they be needed to save his

He was rather reluctant about "tipping off his act," as he expressed it, but Judge Neff became interested and wanted to hear all about it. Kachn declared that he has been placed in a coffin which had been properly upholstered, and that it has been lowered into a grave six feet and four inches deep. An air shaft is constructed and the grave closed.

"What is the air shaft for?" asked the Presecutor.

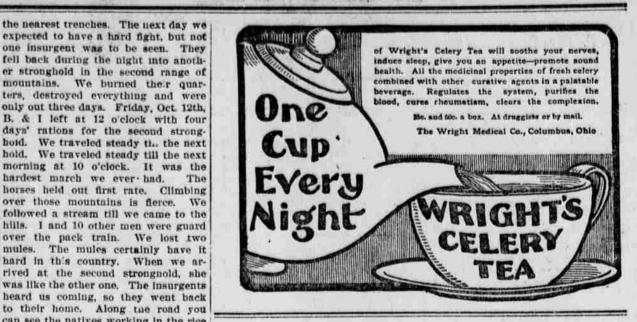

"For air." replied Kaehn, "and for sending down the beer, water, and grub.

"Then you always had to have air. did you?" continued the Prosecutor. "Oh, no. Sometimes I was completely buried for twenty-four hours. In a case of that kind a bucket of water was placed in the coffin and several sponges saturated with water. The water evaporated, and that furnished

all the oxygen I needed to live on."
